Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 9-17, and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Stadlmayr (DE 2,124,684). Applicant's attention is directed to the Figure 3 embodiment. The various electrodes are configurable to assume different active and common configurations; however, the term "configurable" relates to no more intended use of the electrodes absent any positively recited structure effecting the same.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7, 9-17, 23, 25-30, 32, 34-39, and 41-46 are rejected under either 35 U.S.C. 102(b) or 35 U.S.C. 103(a) as being anticipated by, or in the alternative, unpatentable over Mahvi et al (2002/0022864). The basic device is disclosed by Mahvi et al in Figures 2, 3, and 7. The use of a third electrode set is clearly shown in Figure 7 and detailed at paragraph [0069]. Figure 2 also shows the use of one of the electrode sets as a common electrode, while Figure 4 discloses that a large lesion volume is desired. The various electrodes are configurable

to assume different active and common configurations; however, the term “configurable” relates to no more than intended use of the electrodes absent any positively recited structure effecting the same. However, it would have been obvious to the skilled artisan to render the middle electrode as the common electrode since the reference clearly teaches larger lesion volumes are desired and such connection would inherently accomplish the same.

Response to Arguments

Applicant's arguments with respect to the above claims have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
